

Reflection on Iteration #2

Context Project: A Search And Rescue Mission

Group: 2

User Story #	Task					
	Id	Assigned to	Estimated effort	Actual effort	Done	Notes
Bot-store	Task 1	Joost	1 unit	4 hours	Yes	The Botstore is now implemented completely the same as the scenario GUI and in MVC. Also spend some extra time on improving the GUI and making it actually up to date with our plans for the final product at this stage.
	Task 2	Arun	4 units	4 hours	yes	I started at this task at the beginning of the sprint but the botgui was still being changed so I had to keep changing my test. So to prevent this I finished my task at the end of the sprint. Furthermore I worked on bug fixes and continuous integration.
	Task 3	Tim	5 units	6 hours	no	Integrating it takes longer than suspected because of newer versions of the botstore GUI being uploaded while I was working on the integration during project hours, and I was also sidetracked by several non-user-friendly aspects of the scenario GUI
	Task 4	Valentine	1 unit	0	yes	Lost half an hour spending on this task, when I found out someone else already had done it. If anything of the sort happens again, it would be nice to tell me in advance.
	Task 5	Joost	3 units	4 hours	No	Wrote the tests for the structure but not yet managed to get a working test in the human player gui.
	Task 6	Valentine	-	1.5 hour	yes	I have gathered all what we have accomplished so far into a document I will send to the client as soon as I have other groups' own work sum up, so it can serve as compensation for the Scrum Review we did not have this week.

E-partner	Task 1	Wendy	5 units	6.5 hours	yes	I spend approximately 3 hours learning about MVC, how to make a GUI, installing the right plugin and practicing with it. After that it cost me 3,5 hours to actually make the GUI.
	Task 2	Valentine, Ruben	3 units	3 hours	yes	The functionality of the E-Partner that was planned to be built is done.
	Task 3	Valentine	-	2 hours	yes	I have sent two emails to Birna so she could confirm if our concept was correct. We also had a very fruitful meeting with her so she could explain it in person.
	Task 4	Ruben	2 units	2 hours	yes	The integration test of the current E-Partner functionality is done.
Environment Store	Task 1	Valentine	1 unit	0.5 hours	yes	I just have a basic design on paper but we have not had time all together to discuss it. We were more focused on other more prominent tasks.

Main Problems Encountered

Problem 1

Description: We managed to implement a basic set up for the e-Partner, but after the meeting we had organized with Birna, we found out that our implementation still did not fully coincide with what she had in mind.

Reaction: We have exchanged more emails with her and now we have a very good idea of what we should further implement.

Problem 2

Description:

Reaction:

Adjustments for the next Sprint Plan

Next sprint, we want to communicate more with the client, so we can definitely sure that what we are doing is correct. Also, we would like to enhance communication within the group to avoid incidents such as working on a task that has already been finished by somebody else.
