Reflection on Iteration #3

Context Project: A Search And Rescue Mission

Group: 2

User Story #	Task					
	Id	Assigned to	Estimated effort	Actual effort	Done	Notes
1	Task 1	Valentine, Wendy	4 units	6 units	Yes	Valentine did the task. The e-Partner functionality is implemented. E-Partners show on the map and can be picked up by robots.
	Task 2	Joost	2 units	2 units	Yes	The e-partner has been tested and is working but its functionalities that it actually adds to a human user have not fully ben implemented. Tested have been the structure, placement in map, and pickup actions.
2	Task 1	The Team	3 units	10 units	Yes	The scenario Editor (from group 3) has now been fully integrated with our botstore and handicaps. Unfortunately the integration caused a lot of errors in the funtionality that we were not expecting.
	Task 2	Valentine	1 unit	1 unit	Yes	The client has given us feedback on our design.
	Task 3	Wendy	5 units		No	I did make a start, but we decided to move it to the sprint from next week because other tasks had a higher priority (getting everything to work for the demo on Thursday).
	Task 4	Ruben	2 units		Yes	
	Task 5	Arun	3 units	1 unit	No	I started at this but it is not possible to test the save buttons with the current structure. I decided to stop working on this until the mvc structure was done because this meant all the test had to be fixed anyway

User Story #	Task					
	Id	Assigned to	Estimated effort	Actual effort	Done	Notes
3	Task 1	Tim	5 units	0 units	yes	This was done by group 3 before.
	Task 2	Ruben	5 units			
4	Task 1	Valentine	1 unit	1 unit	Yes	The client has given us feedback on our design.
	Task 2	Arun	5 units	5 unit	Yes	The epartner has been integrated with the scenario editor. The integration did not take as much time as expected but there were some little bugs that took some time to fix. Like saving the epartner didn't work. Also did some work on the botstore in this time
5	Task 1	Ruben, Joost	4 units	5 units	Yes	Testing all the handicaps turned out to take a little more time than expected because we had to work through some integration errors first to actually start testing (The Unit tests were already almost done).
6	Task 1	Valentine, Wendy	5 units		No	This task was also delayed because of the other higher priority tasks. Our new goal is to have this fixed on friday.
	Task 2	Joost, Tim	8 units	12 units	Yes	This single task took longer, but it also takes into account putting the final touches on the botstore GUI.
	Task 3	Valentine	3 units	10 units	No	Wendy did this task. It took a lot more time than expected, especially the MVC structure turned out to take a lot of time. But now it's almost done.

Main Problems Encountered
